## Newport Girls' High School

Subject: Mathematics Lead Teacher: Mrs L Roberts Year: 11

## Curriculum organisation

Students are taught for three lessons a week in three groups of 30. There is a set A, a set B and two parallel set C's. Students' sets appear of their timetable, which is available to parents/guardians on Edulink.

Set A - Overview of Topics & Key Information					How will your child be learning?
Term	Unit(s) of Work	Key Enquiry Questions	Key Content/ Terminology	Skills developed	Whole class discussion     Pair work
Autumn Term	<ul> <li>Exponential functions</li> <li>Graphs</li> <li>Trigonometric graphs and equations</li> <li>Non-linear simultaneous equations</li> <li>Functions</li> <li>Graph transformations</li> <li>Numerical methods</li> <li>Proof</li> <li>Interpreting graphs</li> <li>Algebraic fractions</li> </ul>	<ul> <li>How many solutions does a trigonometric equation have?</li> <li>How are solutions to sine equations related?</li> <li>How do you find the inverse function?</li> <li>What is an inverse function given a transformation?</li> <li>How do you know what transformation it is referring to?</li> <li>What notation is used for even and odd numbers, consecutive numbers etc?</li> <li>How do you find the gradient of a curve?</li> <li>What is the difference between the instantaneous rate and average rate?</li> <li>What does the area under a speed time represent?</li> <li>What are similarities and differences between exponential growth and decay graphs?</li> <li>What are the key features of a cubic, exponential and reciprocal graphs?</li> </ul>	<ul> <li>Exponential functions, growth, decay, exponential graphs</li> <li>Cubic graphs, reciprocal graphs</li> <li>Sine, cosine, tangent, period</li> <li>Non-linear equations, quadratic equations, approximate roots graphically</li> <li>Functions, inverse, composite</li> <li>Translation, reflection</li> <li>Approximate solutions, iteration, sign-change method,</li> <li>Algebraic proof, arguments</li> <li>Real world graphs, average rate, instantaneous rate, estimate gradients and area under graphs</li> </ul>	<ul> <li>Express exponential growth and decay as formula, solve growth and decay problems, plot, sketch and recognise exponential graphs</li> <li>Plot, sketch and recognise reciprocal and cubic graphs</li> <li>Solve trigonometric equations</li> <li>Recognise and sketch the graphs of y = sinx, y = cosx and y = tanx.</li> <li>Solve simultaneous equations where one is a quadratic or it results in a quadratic; use graphs to approximate solutions</li> <li>Find inverse and composite functions</li> <li>Identify and sketch translations and reflections of graphs</li> <li>Approximate solutions to equations using iteration</li> <li>Use algebra to construct proofs and arguments</li> <li>Estimate gradients using tangents, estimate areas under graphs; calculate average and instantaneous rates of change; interpret in context such as velocity-time graphs and distance-time graphs</li> </ul>	<ul> <li>Problem-solving tasks</li> <li>Independent work</li> <li>Group work</li> <li>Investigations</li> </ul>

	• Sequences* • Factor theorem* • Introductory calculus, calculus applications*  *further mathematics only	<ul> <li>What happens to a sequence as n tends to infinity?*</li> <li>How can you factorise cubic expressions?*</li> <li>How can you find the gradient of a curve algebraically?*</li> <li>What is differentiation?*</li> <li>What is an increasing or decreasing function?*</li> <li>How can differentiation be used to solve problems in context?*</li> </ul>	<ul> <li>Limiting values, quadratic and linear sequences*</li> <li>Roots, polynomials, factors*</li> <li>Calculus, differentiation, ,rates of change*</li> <li>Sketching graphs, multiple domains, turning points, inequalities*</li> <li>Stationary points, increasing and decreasing functions, equations of normal and tangents, maximum and minimum points*</li> </ul>	<ul> <li>Work out limiting values of sequences, find the nth term for quadratic sequences*</li> <li>Find roots of polynomials, factorise polynomials, solve polynomial equations*</li> <li>Differentiate algebraic expressions with integer and fractional indices; use differentiation to find gradient of curves*</li> <li>Find stationary points of curves, determine the nature of stationary points; find equations of normal and tangents; apply calculus to problems in context*</li> </ul>	
Spring Term	Revision and exam practice      Further trigonometry*     Trigonometry and Pythagoras*     Matrix multiplication*     Matrix transformations*     *further mathematics only	<ul> <li>How do you find the angle between two planes?*</li> <li>How are trigonometry and Pythagoras directly related?*</li> <li>How many solutions should a trigonometric equation have?*</li> <li>Why can trigonometric equations have more than one solution?</li> <li>How do you find other solutions to trigonometric equations?*</li> <li>What is a matrix?*</li> <li>What does multiply matrices mean?*</li> <li>Can all matrices be multiplied?*</li> </ul>	<ul> <li>Angles between planes or lines, Pythagorean triples*</li> <li>Trigonometric identities, trigonometric equations*</li> <li>Matrix, scalar, order, associative, commutative, identity matrices*</li> <li>Unit square, matrix transformation*</li> </ul>	<ul> <li>Calculate angles between planes, apply trigonometry and Pythagoras in 3D*</li> <li>Sketch and use trigonometric graphs, use trigonometric identities, solve trigonometric equations*</li> <li>Multiply 2x2 or 2x1 matrices*</li> <li>Apply matrix transformations and know the corresponding matrix representations*</li> </ul>	

		• What is the matrix that represents a reflection on the x-axis?*		
Summer Term	Revision and exam practice			

Set B - Overview of Topics & Key Information				on	How will your child be learning?
Term	Unit(s) of Work	Key Enquiry Questions	Key Content/ Terminology	Skills developed	Whole class discussion     Pair work
Autumn Term	<ul> <li>Exponential functions</li> <li>Graphs</li> <li>Trigonometric graphs and equations</li> <li>Non-linear simultaneous equations</li> <li>Functions</li> <li>Graph transformations</li> <li>Numerical methods</li> <li>Proof</li> <li>Interpreting graphs</li> <li>Algebraic fractions</li> </ul>	<ul> <li>How many solutions does a trigonometric equation have?</li> <li>How are solutions to sine equations related?</li> <li>How do you find the inverse function?</li> <li>What is an inverse function given a transformation?</li> <li>How do you know what transformation it is referring to?</li> <li>What notation is used for even and odd numbers, consecutive numbers etc?</li> <li>How do you find the gradient of a curve?</li> <li>What is the difference between the instantaneous rate and average rate?</li> <li>What does the area under a speed time represent?</li> <li>What are similarities and differences between exponential growth and decay graphs?</li> <li>What are the key features of a cubic, exponential and reciprocal graphs?</li> </ul>	<ul> <li>Exponential functions, growth, decay, exponential graphs</li> <li>Cubic graphs, reciprocal graphs</li> <li>Sine, cosine, tangent, period</li> <li>Non-linear equations, quadratic equations, simultaneous equations, approximate roots graphically</li> <li>Functions, inverse, composite</li> <li>Translation, reflection</li> <li>Approximate solutions, iteration, sign-change method,</li> <li>Algebraic proof, arguments</li> <li>Real world graphs, average rate, instantaneous rate, estimate gradients and area under graphs</li> </ul>	<ul> <li>Express exponential growth and decay as formula, solve growth and decay problems, plot, sketch and recognise exponential graphs</li> <li>Plot, sketch and recognise reciprocal and cubic graphs</li> <li>Solve trigonometric equations</li> <li>Recognise and sketch the graphs of y = sinx, y = cosx and y = tanx.</li> <li>Solve simultaneous equations where one is a quadratic or it results in a quadratic; use graphs to approximate solutions</li> <li>Find inverse and composite functions</li> <li>Identify and sketch translations and reflections of graphs</li> <li>Approximate solutions to equations using iteration</li> <li>Use algebra to construct proofs and arguments</li> <li>Estimate gradients using tangents, estimate areas under graphs; calculate average and instantaneous rates of change; interpret in context such as velocity-time graphs and distance-time graphs</li> </ul>	<ul> <li>Problem-solving tasks</li> <li>Independent work</li> <li>Group work</li> <li>Investigations</li> </ul>

Spring Term	Revision and exam practice		
Summer Term	Revision and exam practice		

Set C - Overview of Topics & Key Information				on	How will your child be learning?
Term	Unit(s) of Work	Key Enquiry Questions	Key Content/ Terminology	Skills developed	Whole class discussion     Pair work
Autumn Term	Volume and Surface Area     Congruence     Similarity     Inequalities     Algebraic fractions	<ul> <li>Find the radius of a sphere given a known volume</li> <li>How do you find the volume of a frustum?</li> <li>What is congruence?</li> <li>What information do you need to prove two triangles are congruent?</li> <li>If a shape has volume 27 times larger, how much larger is its height?</li> <li>How do you prove two triangles are similar?</li> <li>Is solving inequalities the same as solving equations, if not what are the differences?</li> <li>How do you represent an inequality with two variables graphically?</li> <li>How many integer solutions are there to these three inequalities?</li> <li>How do you add algebraic fractions?</li> <li>What do algebraic fractions need for you to be able to simplify them?</li> </ul>	<ul> <li>Volume, surface area, sphere, pyramid, cone, prism, cylinder, frustums</li> <li>Congruent triangles properties, proof of congruence,</li> <li>Similarity properties, length, area and volume scale factors,</li> <li>Inequalities, regions, set notation</li> <li>Fractions, common denominator, simplify fractions</li> </ul>	<ul> <li>Calculate the volume and surface of prisms, cylinders, cones, spheres, pyramids and composite solids</li> <li>Prove triangles are congruent</li> <li>Prove triangles are similar, understand the relationship between length, area and volume of similar shapes</li> <li>Solve linear inequalities in one and two variables, solve quadratic inequalities</li> <li>Simplify and manipulate algebraic fractions</li> </ul>	<ul> <li>Problem-solving tasks</li> <li>Independent work</li> <li>Group work</li> <li>Investigations</li> </ul>

Spring Term	<ul> <li>Exponential functions</li> <li>Graphs</li> <li>Trigonometric graphs and equations</li> <li>Non-linear simultaneous equations</li> <li>Functions</li> <li>Graph transformations</li> <li>Numerical methods</li> <li>Proof</li> <li>Interpreting graphs</li> <li>Algebraic fractions</li> </ul> • Revision and exam	<ul> <li>How many solutions does a trigonometric equation have?</li> <li>How are solutions to sine equations related?</li> <li>How do you find the inverse function?</li> <li>What is an inverse function given a transformation?</li> <li>How do you know what transformation it is referring to?</li> <li>What notation is used for even and odd numbers, consecutive numbers etc?</li> <li>How do you find the gradient of a curve?</li> <li>What is the difference between the instantaneous rate and average rate?</li> <li>What does the area under a speed time represent?</li> <li>What are similarities and differences between exponential growth and decay graphs?</li> <li>What are the key features of a cubic, exponential and reciprocal graphs?</li> </ul>	<ul> <li>Exponential functions, growth, decay, exponential graphs</li> <li>Cubic graphs, reciprocal graphs</li> <li>Sine, cosine, tangent, period</li> <li>Non-linear equations, quadratic equations, simultaneous equations, approximate roots graphically</li> <li>Functions, inverse, composite</li> <li>Translation, reflection</li> <li>Approximate solutions, iteration, sign-change method,</li> <li>Algebraic proof, arguments</li> <li>Real world graphs, average rate, instantaneous rate, estimate gradients and area under graphs</li> </ul>	<ul> <li>Express exponential growth and decay as formula, solve growth and decay problems, plot, sketch and recognise exponential graphs</li> <li>Plot, sketch and recognise reciprocal and cubic graphs</li> <li>Solve trigonometric equations</li> <li>Recognise and sketch the graphs of y = sinx, y = cosx and y = tanx.</li> <li>Solve simultaneous equations where one is a quadratic or it results in a quadratic; use graphs to approximate solutions</li> <li>Find inverse and composite functions</li> <li>Identify and sketch translations and reflections of graphs</li> <li>Approximate solutions to equations using iteration</li> <li>Use algebra to construct proofs and arguments</li> <li>Estimate gradients using tangents, estimate areas under graphs; calculate average and instantaneous rates of change; interpret in context such as velocity-time graphs and distance-time graphs</li> </ul>	
Term	practice				

Standard school stationery (Pencil, Blue/Black Pen, Green Pen,	End of half term tests
Rubber, Sharpener, Ruler, Whiteboard pen)	Formal assessment week
Exercise book	Peer and self-assessment
Scientific Calculator	Homework tasks
Pair of Compasses	Retrieval practice activities
Protractor	

Extension & Enrichment opportunities	What can you do to support your child?
<ul> <li>Intermediate mathematics challenge</li> <li>Further mathematics Level 2 qualification</li> <li>Problem-solving lunchtime club</li> </ul>	<ul> <li>Several websites are very useful that include videos, questions and walked through examples, these are: mymaths.co.uk, corbettmaths.com, mathsgenie.co.uk and drfrostmaths.com</li> <li>Encourage regular revision</li> </ul>
Inclusion	Inclusion within Y11 Maths
<ul> <li>Teachers follow student passports to ensure that the needs of all students with SEND are met.</li> <li>Work is enlarged to the necessary size for visually impaired students.</li> <li>Teachers will ensure that classrooms are quiet learning environments where possible and will dim lights to support students with sensory needs.</li> <li>Students have the use of laptop if they have a SEND need whereby use of a laptop supports them.</li> <li>Hearing impaired students are supported through use a radio aid and teachers ensure that students can lip read at all times during lessons.</li> <li>Dyslexic students are encouraged to use coloured overlays when they are required to read long passages.</li> <li>Use of dyslexic friendly fonts and coloured backgrounds used in PowerPoints/resources.</li> <li>Students with ADHD are given movement breaks, fidget toys and lessons are 'chunked' to aid concentration.</li> <li>Students are seated according to their needs, students work with the SENDCo to decide upon this.</li> </ul>	<ul> <li>Equipment is adapted wherever necessary to accommodate the needs of students with SEND</li> <li>Where necessary, pupils are given frequent one to one tutorials to revisit previous topics and methods taught to support their understanding</li> <li>Pupils are provided with online resources to help with learning outside of the classroom and homework, such as videos and worked examples</li> <li>Students have access to spare mathematical equipment to help with organisation</li> </ul>
