

Subject: Science

Lead Teacher: Dr Catalan (Head of Faculty)

Year: 7

Curriculum organisation
 Students are taught in mixed groups of 28 for three lessons per week. Most classes are taught all three sciences by the same teacher to build continuity and support transition.

What topics will your daughter be studying this year?			How will your daughter be learning?
Biology <ul style="list-style-type: none"> • Biology • Life and cells • Human and Plant Reproduction • Variation and classification • Environment and feeding relationships. 	Chemistry <ul style="list-style-type: none"> • Working in a laboratory • Acids and Metals • Particles and Solutions 	Physics <ul style="list-style-type: none"> • Electricity • Magnetism • Forces 	<ul style="list-style-type: none"> • Whole class discussion • Pair work • Practical activities • Problem-solving tasks
<p>In year 7 we lay the foundations for the three main sciences. We aim to not only expand their knowledge and understanding but also instil excitement and curiosity towards the natural world and the processes that surround us. We aim to foster their research and observational skills as well as build and develop their thinking and reasoning skills. Thus there will be ample opportunities to experience the evidence-based character of science through numerous class experiments and demonstrations. They will also attain an insight into its theoretical side via problem solving through the language of mathematics and logic. We aim to deliver a slightly expanded syllabus which will allow us to show how ideas fit together and how scientific principles come into play in a multitude of ways in their lives.</p>			

Equipment needed for lessons	What can you do to support your daughter?
<ul style="list-style-type: none"> • Standard school stationery • Exercise book • Calculator 	<ul style="list-style-type: none"> • Take an active interest in her learning

How will learning be assessed and progress measured?	Extension & Enrichment opportunities
<ul style="list-style-type: none"> • End of unit tests (subject knowledge focus) • Peer and self assessment • Homework tasks (often research or project based). 	<ul style="list-style-type: none"> • Science Club • Trips & Visits (e.g. Techniquest/Jodrell Bank in Curriculum Enrichment Week)
