

## **Biology Summer Project**

Your task is to learn about DNA and the Human Genome Project.

### **Outcome of project**

- A summary document of your understanding of “The Human Genome Project”.
- A timeline of the knowledge base of DNA starting with the discovery of the structure of DNA by Watson and Crick, any previous theories and subsequent advances in knowledge. To be completed in a written document and handed to the teacher.

Note:

- Please use a number of sources (use variety like books, internet and journal articles)
- Synthesise the information – **do not** copy and paste. Put into your own words.
- At the end of your report list your sources

### **Deadline**

Written work is to be handed to the teacher in the first lesson in September
